

## Featured Product of the Month:

### Miniature Motorized Filter Wheels

Have the need to utilize multiple wavelengths without disturbing your setup? With the smallest footprint of their kind, our Motorized Filter Wheels can be used for a variety of applications, including Color CCD Photography, Fluorescence Microscopy, and Photometry. Additional wheels can be purchased for simple swapping of wavelength sets. We have both 6-position wheels for 25mm filters, as well as 12-position wheels for 12.5mm filters.

Features Include:

- Motorized (Manual Filter Wheels available)
- Local or Remote Control
- Labeled filter positions
- Base and post mountable
- Programmable filter sequences
- Two 4" dia. wheels available: 12.5mm and 25mm
